

ROADSIDE DEBRIS

can create **SERIOUS**

HAZARDS

Logs and debris out of reach of machines

Stumps, boulders and debris hung up in standing timber

Unstable or undermined trees or stumps

Trees or logs pushed or leaning into standing timber

You can help change that:

Plan and fall an appropriate right-of-way width

Endhaul hazardous debris to a stable spoil site

Communicate and get approval for major changes (including moving the road centerline)

OHSR 26.80 Creating additional hazards
Road or skid trail construction, including any blasting activity, must be carried out in a manner that prevents hangups, hanging broken tops or limbs, leaners, sidebind of pushed trees, or similar hazards which could endanger fallers or other workers.

Load out right-of-way prior to falling the setting below

Provide written documentation of worksite hazards to the next phase

Coast Harvesting Advisory Group
